DETAILED ACTION

1. This action is responsive to communications: original application filed 08 December 2000 with acknowledgement of a continuation date of 20 July 2000.

2. Claims 1-102 are currently pending in this application. Claims 1, 23, 24, 25, 26, 36, 37, 38, 39, 47, 55, 56, 57, 58, 70, 71, 72, 73, 80, 81, 82, 83, 84, 100, 101, and 102 are independent claims.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1, 3-5, 7-11, 15, 16, 20-25, 39-43, and 86-88 are drawn to a data exchange method with encryption and key exchange, classified in class 713, subclass 171.

II. Claims 26-31, 33, 36-38, and 46 are drawn to data exchange method utilizing a computer program with encryption and key exchange, classified in class 380 subclass 104.

III. Claims 2, 47-52, 55, 56, and 57 are drawn to a method of transferring data including and identification of the device type classified in class 710, subclass 15.

IV. Claims 32, 35, 53, 54, 58-66, 68, and 70-72 are drawn to a data exchange method including checking driver type, classified in class 719, subclass 169.

V. Claims 73-83 are drawn to a data exchange method with decrypting hardware that contains an inaccessible part, classified in class 380, subclass 240.

Art Unit: 2134

V1. Claims 6, 12-14, 17-19, 34, 44, 45, 67, 69, 84, 85, and 89-102 are drawn to a distribution method with a plurality of distributors including online payment, classified in class 705, subclass 53.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I through VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I) has separate utility such as encrypted data and key exchange (II) has separate utility such as a computer program utilized to exchange encrypted data and keys, invention (III) has separately utility such as transferring method that identifies device type, invention (IV) has separate utility such as driver type, invention (V) has separate utility such as decrypting hardware, invention V1 has a separate utility such as a data distribution method with a plurality of distributors with online payment. (See MPEP § 806.05(d)).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, Group III is not required for Group IV, Group IV not required for Group V, and Group VI not required for Groups I, II, III, IV, or V restrictions for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2134

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the -fee required under 37 CFR 1.17(i).
